---

**WORK PORTFOLIO:** [tylergroat.github.io](https://tylergroat.github.io)

## PROFESSIONAL SUMMARY

Highly motivated software engineer with a focus on software engineering, web development, and database management. Strong ability to apply knowledge of software engineering principles to adapt to any stack or workflow. Committed to continuous learning and fostering a collaborative approach to contribute effectively in a professional environment.

## EDUCATION

**Wayne State University, Detroit, MI - Bachelor Degree in Computer Science** May 2023

Relevant Courses: Software Engineering, Java Programming, Computer Operating Systems, Database Management Systems, Web Technology, Computer Architecture & Organization, Human-Computer Interaction

## PROFESSIONAL EXPERIENCE

**Sound Logics LLC - Software Engineer** Jun 2024 - Present

- Mobile app developer for SoundLogics, a startup in the security industry, building a cross-platform mobile app using NativeScript with Angular.
- Focused on iOS development, ensuring UI/UX consistency and performance in the iOS simulator and on physical devices.
- Implemented and debugged core features using TypeScript, HTML, and CSS within VSCode, contributing to scalable and maintainable frontend architecture.
- Practiced agile development workflows and used Git version control.
- Key Technologies: Angular, NativeScript, TypeScript, HTML, CSS, iOS Simulator, VSCode, Xcode, NativeScript CLI, LiveSync

**Senior Capstone Project, Wayne State University - Software Engineer** Jan 2023 - May 2023

- Developed a Flutter + Dart application with a team consisting of myself and three others.
- Designed an appealing, user-friendly, cross-platform, responsive UI.
- Developed the back end for multiple features within the app including API integration.
- The project is currently private on GitHub, but I will provide access upon request.

**U.S. Steel - Great Lakes Works, Ecorse, MI - Intern Software Engineer** Jun 2019 - Jan 2020

- Responsible for tasks related to the front end of a project that utilized IoT modules to analyze various operations at the Great Lakes Works plant.
- Collaborated with team members to execute the project.
- Gained experience in working with Oracle database and JavaScript.
- Demonstrated strong attention to detail and ability to meet deadlines.

## TECHNICAL SKILLS

Full Stack Software Engineering, Agile Development Workflow, Cross-Platform App Development, Git Version Control, Experience with Multiple Code Languages (Java, C, C++, HTML, SQL, and more), Experience with Multiple Stacks (Flutter, Angular, SvelteKit, Android, Spring Boot, JavaFX, and more)
